

# Think You Can Find a Better High Efficiency Commercial Water Heater?

Think Again.

Ultra-efficient, ultra-quiet and ultra-flexible, that's how you describe the eF Series® of commercial water heaters from Bradford White. And now, with the addition of three 60-gallon models, your options for the ultimate commercial installation have doubled!

The eF Series® has remarkable thermal efficiency ratings that go as high as 99.1%. In addition to this remarkable performance, the eF Series® is second-to-none in installation flexibility. All models can vent vertically or horizontally and are approved for unbalanced, direct-vent closed combustion applications.

The eF Series® is noticeably more quiet than any other water heater in its class. Building owners, managers and occupants will appreciate the difference. Plus, eF Series® water heaters feature the Hydrojet® Sediment Reduction System, a self-cleaning feature that helps extend the life of the water heater.

If your application calls for a commercial water heater that meets high demands for hot water, saves energy and can be installed in difficult locations, think eF Series®. It's the ultimate good idea.
